About Me

I am a reliable, responsible, and structured person who takes great pride in always delivering good results. I am happy to work alone on projects, but I also get good energy from working in smaller groups. Additionally, I enjoy the knowledge sharing that collaboration involves.

I am resilient, have a lot of overview, and a broad knowledge of IT, but I am always looking for more experience in the field.

In my free time, I enjoy gaming, being with friends, and working on creating .net discord bots, and more.

Nuxt.js   .Net

Vue.js   Blazor

Typescript   Core

Ms/Mysql   VB.Net

Experience

2021(October)-Present: FlexPOS/Amero, Full stack developer

- My primary tasks have been to port a very large asp.net site to vue.js and develop new systems. We used a web API written in .net C#. I have been in charge of SAF-T integration and other Nuxt 2/3 projects.

2019(March)-2021(July): 3d-empire, Apprentice

- I worked with: Asp.net core, .Net 3.1, Blazor, Unity, Asp.Net MVC, and Vb.net.

Education

2019-2021: Multimedia-Integrator, 3D College

- The education consisted of 36 weeks in school and the rest at 3d-empire. Throughout this process, I have worked and learned many frameworks and programming languages.

2016-2018: Web-Integrator, 3D College

- In this education, I have learned to build forums as well as other various types of websites. Mainly coding in HTML, CSS, JavaScript and .Net MVC.

Work projects

- SAF-T - Integration to skats anti whitewashing system.
- Service Module - RMA sags system.
- Event Orders - Coordination system (Major client: Lego House)
- Backoffice - For insertion of data on point-of-sale systems.

Home projects

- Discord Robots.
